Until June 4, 2004, the FCC is soliciting public comments regarding the NAB petition that seeks to stop XM from providing XM Instant Traffic & Weather. Ladies and gentlemen of the FCC, Stop regulating. Someone has built a better mouse trap with regards to XM Satellite radio. The consumer will sort this out. I am thrilled not to be listening to advertisers hocking their wares in order for me to hear the traffic and weather. I pay my subscription upfront for XM. The advertisers pay their fees upfront to the radio station. Commerce is moving. Please don't tell me you are going to restrict my subscription cable service and my internet subscription portal or my subscription newspaper from offering local traffic and weather? Of course not. Nor are you going to restrict satellite radio.
Good day.
Jack Thanum
